Hotel Solutions

Every detail in a hotel should align with guest expectations. The LERUENA Hotel Solution is designed to deliver comfort, aesthetics, and elegance while meeting all operational needs. With its advanced, stylish, and user-friendly products, it provides a seamless experience for both guests and staff, enhancing the overall hotel environment.

- ✓ DND – MUR
- ✓ Card Holder
- ✓ Switch
- ✓ Thermostat
- ✓ Bedside Panels
- ✓ Welcome Panels

Hotel Solutions

Reliability, quality, comfort and cutting-edge technology items play a key role in all energy saving hotel solutions.

Programmable Shutter Control

This product which is one of the solutions that will make the hotel guests feel privileged offers all features required for comfort and convenience.

Programmable Digital Thermostat

Thermostat options that ensure the hotel guests keep the temperature level in their rooms under control throughout their accommodation period, meet the expectations at maximum level.

Hotel Room Warning Units

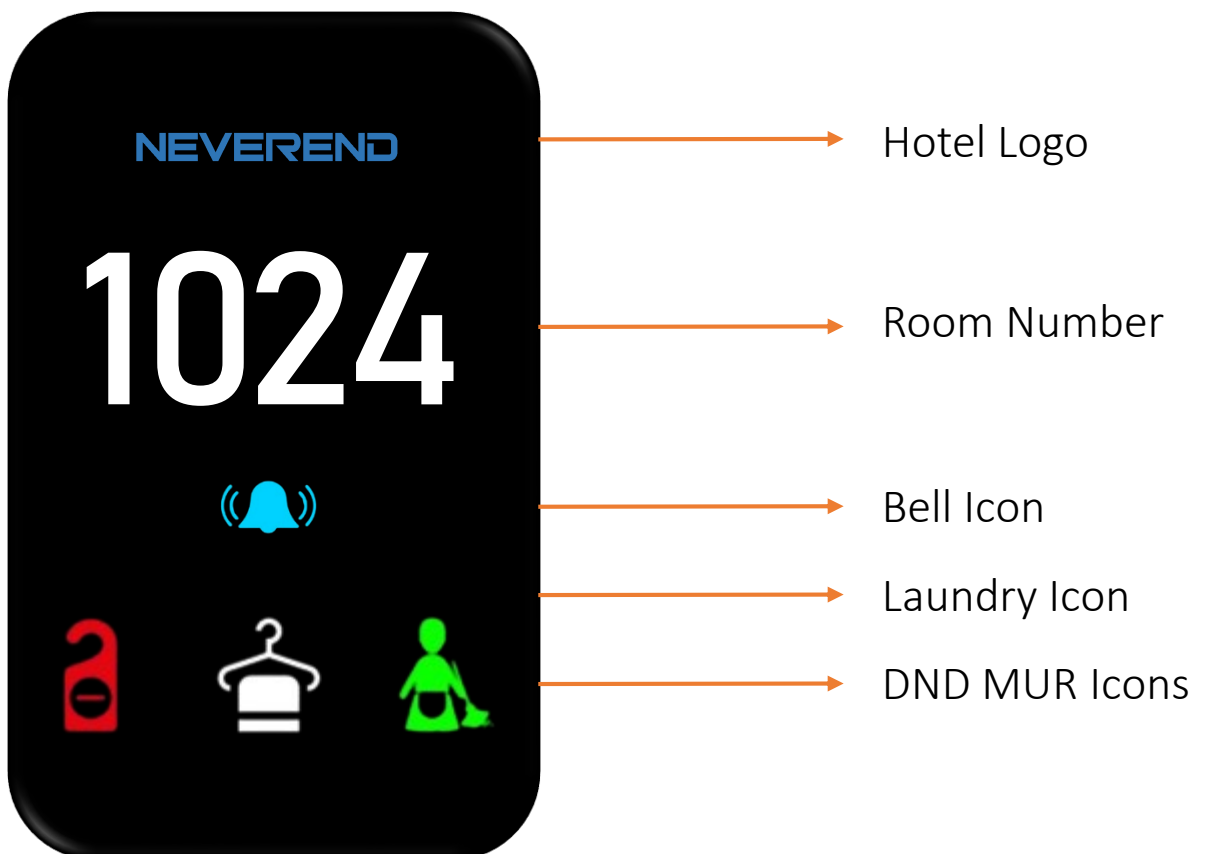

Hotel room units with language options are use friendly and ensure the comfort level required for the satisfaction of guests. DND / MUR systems protected against overheating and resistant against deformation are offered within decorative and elegant series that can be used in multiple framing when necessary.

DND MUR

Introducing the DND MUR Display – an elegant, intuitive solution designed to enhance guest experience and streamline room management. This sleek glass touchscreen panel features:

- Customizable room number and hotel branding for a personalized touch.
- Real-time status indicators (Laundry, Do Not Disturb, Make Up Room) for seamless communication between guests and staff.
- Integrated doorbell button to notify occupants discreetly.

Combining modern design with user-friendly functionality, the DND MUR Display ensures effortless coordination while maintaining a polished, professional aesthetic. Perfect for elevating service efficiency and guest satisfaction.

Energy Saver

Sensor category products with easy mounting options that do not require any alterations fulfill all requirements thanks to their wide decorative options.

The Energy Saver Card Holder enhances efficiency by automatically turning off all electronic devices when guests leave the room, ensuring energy savings and convenience. Featuring advanced contactless technology, it seamlessly reads RF-ID cards for a smooth and effortless experience.

Energy Saver with Mechanical Switch (Weak Current)

- 5V DC operating voltage
- Operation with smart card or key chain
- Compatible with ESCU relay family
- Usage with Door / Window contacts and VRV air-conditioning systems
- Wide field of application compatible with all doors and hotel cards

RF Energy Saver

- 5V DC operating voltage • 125kHz and 13.56Mhz frequency options
- Operation with smart card
- Smart card recognition for authorized use
- Compatible with ESCPU relay family • Usage with Door / Window contacts and VRV air-conditioning systems

Magnetic - Standard Energy Saver

- 220V operating voltage
- Operation with key chain
- Compatible with Energy Saver relay (11-pin)

Energy Saver with Mechanical Switch (220V)

- 220V operating voltage
- Operation with smart card or key chain
- Ease of cabling and mounting
- Safe usage with contactor
- Wide field of application compatible with all doors and hotel cards

Easier and safer life at home, office, etc. with technologies that enhance the quality of life...
Privilege of motion sensors is everywhere.

Motion Sensor without Neutral

- 180° sensing angle
- Sensing distance of 5 m or 8 m
- Timing of 10 sec - 20 min
- 5 - 200 lux daylight adjustment
- 220~240V AC 50Hz
- Compatibility with incandescent lamps up to 300W
- Compatibility with halogen lamps featuring mechanical and electronic transformer up to 300VA
- On-Off button • LED indicating the operating mode

Slave Motion Sensor with Neutral

- 180° sensing angle
- Sensing distance of 8 m
- 220~240V AC 50Hz
- Compatibility with incandescent lamps up to 2300W
- Compatibility with halogen lamps featuring mechanical and electronic transformer up to 1500VA
- Compatibility with CFL lamps up to 1500VA
- Compatible for use with master motion sensors

Dimmer Solutions

Thanks to its technology and design, dimmer family offers prestige, comfort and convenience to living areas, business places and meeting rooms.

RLC Pro Dimmer

- 20W - 350W
- Compatibility with R, L and C load types
- Overcurrent protection
- Overload protection
- Smart dimmer function that recognizes the load type
- Push On / Off function

RC Pro Dimmer • 40W - 400W

- Compatibility with R and C load types
- Overload protection NEW
- Short circuit protection
- Two-way function
- Push On / Off function

RL Pro Dimmer

- 60W - 400W and 20W - 500W **NEW**
- Compatibility with R and L load types
- Overload protection
- Short circuit protection
- Two-way function
- Push On / Off function

RL Pro Dimmer LED Dimmer

- 6W - 100W
- Compatibility with R and L load types
- Overload protection
- Short circuit protection
- Two-way function
- Push On / Off function

Light-Touch Buttons

Effortless control at your fingertips – our light-touch buttons ensure a smooth, responsive experience with minimal pressure. Designed for convenience and durability, they offer precision and elegance in every press.

Glass Touch Buttons

Featuring an elegant, user-friendly glass design, our touch panels seamlessly integrate into any interior with a range of color options. Designed for effortless control, the glass touch buttons provide a smooth, responsive experience with minimal pressure. Engineered for durability and precision, they offer both style and functionality. Ideal for hotel projects, button panels can be fully customized with tailored dimensions, configurations, symbols, and labels to meet unique design and operational requirements.

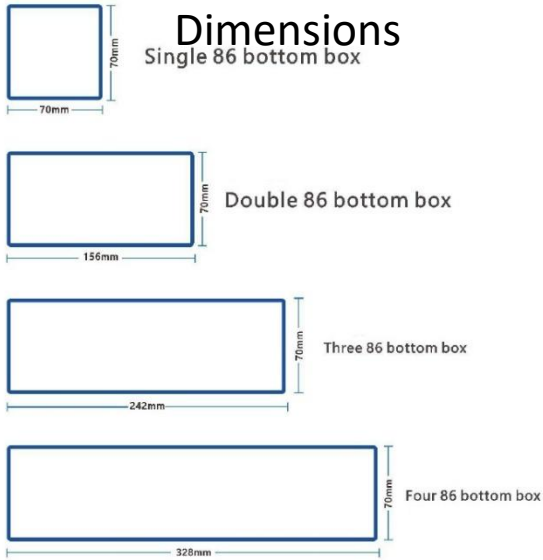

Metal Touch Buttons

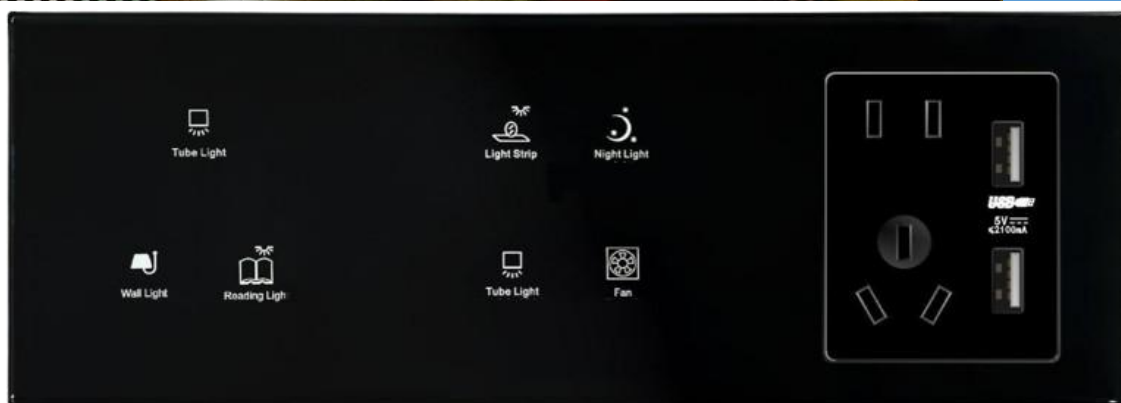

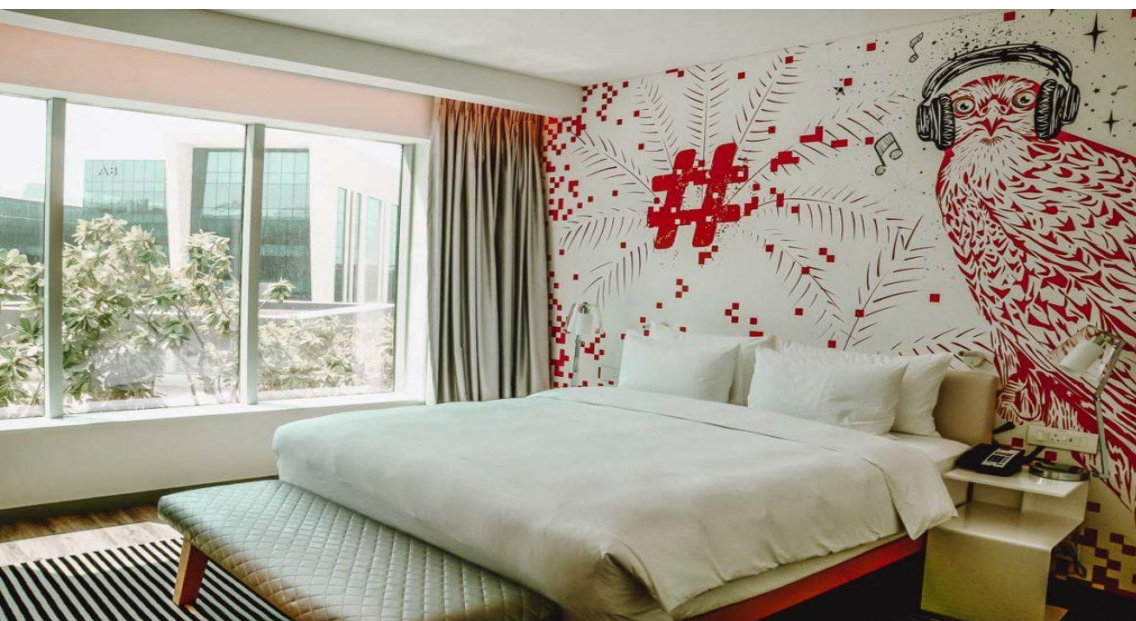

Effortless control at your fingertips – Metal touch buttons ensure a smooth, responsive experience with minimal pressure. Designed for convenience and durability, they offer precision and elegance in every press. Perfect for hotel projects, button panels can be customized with specific dimensions, button configurations, symbols, and labels to match unique design and functionality requirements.
